Description:

How will your students answer when an interviewer asks, "***What social media networks are you on, and what will I learn about you if I go there?***"

Equipping students for their future begins by helping them become digital leaders now. In our

networked society, students need to learn how to leverage social media to connect to people, passions, and opportunities to grow and make a difference.

When people think of kids and their devices, it is often with dismay. But technology is here to stay, which means we must **educate**, **empower**, and **inspire** our students to use social media to ...learn and share learning, address societal inequality, share their voices, and be a more positive influence in others' lives

Social LEADia addresses the need to shift our conversations at school and at home from digital citizenship to **digital leadership**.

Inside, you'll read about some amazing kids who are leveraging social media in positive and powerful ways. They are passionate and empathetic leaders online and offline, and they model the reality that students don't need to wait for tomorrow to lead--they can be world-changers TODAY.
